akhilr.web.app

EDUCATION

B.E in Computer Science & Engineering
Kongunadu College of Engineering and Technology
Expected to graduate in 2027
CGPA: 7.42

Higher Secondary Certificate
Chellamal Matric Hr Sec School, Trichy
2023 77.3%

Secondary School Certificate
SBIOA CBSE School, Trichy
2021 68.6%

SKILLS

Technical

- Python, SQL
- REST APIs, Backend Development
- Web & Network Security
- Machine Learning, Deep Learning

Tools

- Git, Linux, Docker
- MySQL, Firebase

Soft Skills

- Problem Solving
- Team Collaboration

SUMMARY

Computer Science engineering student with hands-on experience building and deploying software. Skilled across the full development lifecycle, with a focus on clear, reliable, and maintainable systems.

EXPERIENCE

Backend Developer Intern June 2025 – July 2025
VR Della Infotech Trichy, India (Offline)

- Built and maintained REST APIs for backend application features.
- Implemented authentication, role-based access control, and data validation.
- Optimized database queries and schemas, reducing response time by ~50%.

Cybersecurity Intern Apr 2025 – Jun 2025
Cothon Solutions Remote

- Developed automated vulnerability scanning tools aligned with OWASP Top 10.
- Contributed to an AI-powered monitoring system for detecting abnormal activities.
- Designed a web-based admin interface for managing security policies and alerts.

AI & ML Intern Feb 2025 – Mar 2025
Edunet Foundation (AICTE–Industry Program) Remote

- Worked on medical image classification using deep learning models.
- Assisted in training and evaluating CNN-based systems for disease detection.
- Integrated trained models into a simple API for inference and testing.

KEY HIGHLIGHTS

- Built and maintained backend APIs as part of internship and academic projects.
- Gained hands-on experience working across backend development and applied ML components.
- Contributed to deployable software solutions during internship work.

PROJECTS

SecureVault – Enterprise Data Leakage Prevention System

- Built an AI-powered system to monitor and prevent data leakage across multiple channels.
- Processed 100+ daily events using anomaly detection and policy-based controls.
- Implemented dashboards and alerts for real-time monitoring and response.

PADCOM – Personalized AI-Powered Diagnostic Companion

- Developed an AI-based system to detect pneumonia and brain tumors from medical images.
- Applied deep learning models and integrated results into an interactive application.
- Worked across preprocessing, inference, and visualization workflows.

EcoLCA Pro – AI-Powered Life Cycle Assessment Platform

- Built a platform to analyze environmental impact metrics such as carbon, energy, and waste.
- Enabled material-wise comparison and generated intelligent sustainability insights.
- Contributed to system design and AI model integration.

HACKATHONS & CERTIFICATIONS

Hackathons

- IISF 2025 Hackathon
- Health Hackathon (VIT Bhopal & JHU)
- Sustain-AI-Thon (VIT Chennai)
- Artiverse 2.0 (KNCET)
- HackDay Pondy (0x.Day & SMVEC)

Certifications

- AI Job Simulation
- Cybersecurity Analyst Simulation
- Python Bootcamp
- GenAI & XAI Workshop
- IoT

ACHIVEMENTS

1st Prize – Intra-College Hackathon

AI-Driven Smart Learning Platform

- Integrated AI-generated content and MCQ-based assessments with adaptive learning paths.
- Implemented authentication, progress analytics, and PDF export functionality.

Tech Stack: Node.js, Express, Python (Flask), MongoDB, React JS

TECHNICAL INTERESTS

- Cybersecurity
- Backend Systems
- Machine Learning
- Secure Application Development

RESPONSIBILITIES

- Team contributor in academic and hackathon projects
- Assisted in planning and technical discussions

LANGUAGES

- English – Professional Proficiency
- Tamil – Native / Mother Tongue
